First Program in Java

The following java program is used to display the text "Hello Planet!" on the output screen (Console)

Hello.java

```
class Hello {
public static void main (String args[]) {
        System.out.println ("Hello Planet!");
}
}
```

Output

Hello Planet!

Do you know?

- The execution of a console-based Java program begins from the main method.
- out.println() is used to display the text and the value of a variable on the output screen (console).
